

Math Level 2 explores topics such as place value, comparing, addition and subtraction strategies, measurement, big numbers, and parity (evens and odds). Problem-solving strategies are emphasized throughout the course, and each lesson includes challenging word problems and puzzles that guide students from the basics toward a deep understanding of the material.

Beast Academy provides a fun, rigorous, and challenging complete curriculum for aspiring math beasts. Our philosophy is that students develop more by learning to solve problems they haven't seen before, as opposed to offering repeated drills that students can memorize their way through.

Book: Beast Academy 2A – 2D

Time Commitment: This 36-week course includes 105 minutes in-class and 60-90 minutes of homework each week, corresponding to a full year course.

Content:

Week	Topic
1	Pirate Numbers
2	Digits
3	Regrouping and Breaking
4	The Number Line
5	Comparing and Ordering
6	Addition by Place Value
7	Addition Strategies
8	Adding Multiple Numbers
9	Test on Book 2A
10	Subtraction by Place Value
11	Subtraction Strategies
12	Subtracting Multiple Numbers
13	Expressions
14	Parentheses and Symbols
15	Equations
16	Problem Solving 1
17	Problem Solving 2
18	Test on Book 2B

Week	Topic
19	Units of Measurement
20	Changing Units
21	Rearranging Expressions
22	Longer Expressions
23	Parentheses and Skip-Counting
24	Odds and Evens
25	Adding Odds and Evens
26	Odd and Even Explorations
27	Test on Book 2C
28	Big Numbers
29	Big Number Computations
30	Comparing and Estimating
31	Stacking Addition
32	Stacking Subtraction
33	Problem Solving 3
34	Problem Solving 4
35	Problem Solving 5
36	Test on Book 2D

Common Core State Standards:

The content covered in our Math Level 2 class is loosely based on the standard created by the Common Core State Standards Initiative. We cover many of the standards from grade 2, as well as standards for grades 3, 4, and 5. You can find a document with the complete list on our Beast Academy Planning page (<https://beastacademy.com/resources/planning>). Or, you can access the standards by navigating directly to <https://beastacademy.com/u/pdfs/planning/standards/BA2Standards.pdf>

Sample Problems:

What number goes in the blank to make a true equation?

$$99 + 99 + 99 + 99 = 400 - \underline{\hspace{1cm}}$$

What is the value of the star in the equation below?

$$32 + \star + \star = 100$$

- ▶ Will adds 50 copies of 75. Is his result even or odd?
- ▶ Use the digits 4, 5, 6, and 7 once each to write a four-digit number that is as close to 5,000 as possible.
- ▶ There are four different 4-digit numbers that can be made using the digits 3, 6, 6, and 6. What is the sum of all four numbers?
- ▶ Ben and Frank compare their coin collections. Together, they have 49 coins. Ben has 5 more coins than Frank. How many coins does Frank have?
