

Math Level 3 explores topics such as multiplication and division, using the distributive property to simplify calculations, two-dimensional shapes, estimation, using variables to write expression and equations, and fractions. Problem-solving strategies are emphasized throughout the course, and each lesson includes challenging word problems and puzzles that guide students from the basics toward a deep understanding of the material.

Beast Academy provides a fun, rigorous, and challenging complete curriculum for aspiring math beasts. Our philosophy is that students develop more by learning to solve problems they haven't seen before, as opposed to offering repeated drills that students can memorize their way through.

Book: Beast Academy 3A – 3D

Time Commitment: This 36-week course includes 105 minutes in-class and 60-90 minutes of homework each week, corresponding to a full year course.

Content:

Week	Topic
1	Triangles
2	Quadrilaterals & Polygons
3	Polyominoes
4	Skip-Counting
5	Hundreds Chart & Balancing
6	Perimeter
7	Challenging Problems 1
8	Area
9	Test on Book 3A
10	Multiplication
11	Commutativity & Associativity
12	More Multiplication & Puzzles
13	Perfect Squares 1
14	Perfect Squares 2
15	Order of Operations, Area Model
16	The Distributive Property
17	Challenging Problems 2
18	Test on Book 3B

Week	Topic
19	Variables
20	Writing Equations
21	Solving Equations
22	Division
23	Remainders 1
24	Remainders 2
25	Units of Measurement
26	Challenging Problems 3
27	Test on Book 3C
28	Unit and Whole-Number Fractions
29	More Types of Fractions
30	Parts of a Whole
31	Comparing Fractions
32	Estimation & Rounding
33	Estimating Quotients
34	Area Measurement
35	Area of Triangles
36	Test on Book 3D

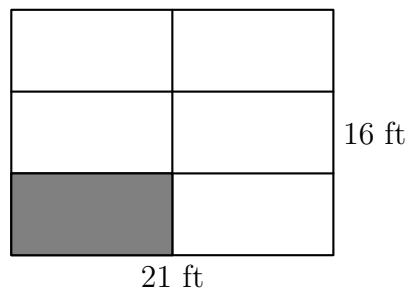

Common Core State Standards:

The content covered in our Math Level 3 class is loosely based on the standard created by the Common Core State Standards Initiative. We cover many of the standards from grade 3, as well as standards for grades 2, 4, 5, and 6. You can find a document with the complete list on our Beast Academy Planning page (<https://beastacademy.com/resources/planning>). Or, you can access the standards by navigating directly to

<https://beastacademy.com/u/pdfs/planning/standards/BA3Standards.pdf>

Sample Problems:

- ▶ Ben skip-counts by 6's starting at 6. Jen skip-counts by 9's, starting at 9. What is the largest two-digit number that Ben and Jen **both** say?
- ▶ Fubert has only 3-gram and 7-gram weights. What is the largest weight that he **cannot** make by combining two or more of these weights?
- ▶ What is the perimeter of an isosceles triangles with sides of length 9 and 4?
- ▶ A rectangle with width 21 ft and height 16 ft is split into six congruent rectangles as shown. What is the area of the shaded region?

- ▶ Max has 7 US coins that are worth a total of 48 cents. How many nickels does he have?
